

Skip Coleman "Street Smart Fire Officer"

Sponsored by The West Chester Fire Organization & IAFF Local 3518

May 22nd 2010 9:00 am-5:00 pm

@ Miami University VOA Campus

Cost \$65.00

Course Description: The presentation follows Chief Coleman's text entitled *Incident Management for the Street Smart Fire Officer*. The presentation discusses Command, the function of the Incident Commander and provides insight on how to run the bread and butter incidents such as residential fires. Not only is the function of the Incident Commander examined, but also the functions of Attack, Ventilation, Back up, Exposure and the other essential functions utilized at a working residential fire. Safety concerns as well as risk analysis and decision making utilizing specific priorities are discussed and emphasized through case studies and simulations.

Skip Coleman is a retired Assistant Chief with the Toledo Fire Department. He had over 32 years experience and managed every major bureau in the department. He has written "Incident Management for the Street Smart Fire Officer" (Fire Engineering 1997), "Incident Management for the Street Smart Fire Officer" (Fire Engineering 2008, Second Edition) and "Managing Major Fires (Fire Engineering 2001) and is moderator of Fire Engineering's "Round Table" monthly article. He serves on the Executive Educational Advisory Committee for FDIC conferences and is Technical Editor for Fire Engineering Magazine.
